U. S. DEPARTMENT OF AGRICULTURE,

DIVISION OF PUBLICATIONS.

FARMERS' BULLETINS

Nos. 276–300,

WITH CONTENTS AND INDEX.

PREPARED UNDER THE SUPERVISION OF

GEO. WM. HILL,

EDITOR AND CHIEF.

WASHINGTON:

GOVERNMENT PRINTING OFFICE.

1908.

LIBRARY
U.S. DEPARTMENT
OF AGRICULTURE

348318

CONTENTS.

	Page.
FARMERS' BULLETIN No. 276.—EXPERIMENT STATION WORK, XXXIX:	
Improvements in peach growing	5
Mulberries	6
Alfalfa culture in the Eastern United States	9
Oat culture in the South	14
Improvement of grass land	18
Succotash as a soiling crop	20
Tankage and bone meal for hogs	21
Grinding corn for hogs	25
Dips as lice killers	25
Digestibility of fish and poultry	26
Honey vinegar	28
Suggestions for the management of the farm woodlot	29
FARMERS' BULLETIN No. 277.—THE USE OF ALCOHOL AND GASOLINE IN FARM ENGINES:	
Sources of power	5
Comparative cost of power from different sources	6
Comparative cost of energy in different fuels	7
Thermal efficiency	8
Adaptability of various types of engines	10
First use of alcohol engines	12
Elementary engine mechanism	15
Explosive mixtures	18
Liquid fuels	22
Heat of combustion	25
Air necessary for combustion	26
Vaporization of fuel	27
Effect of initial compression	37
Practical experience with alcohol engines in Germany	37
Conclusions	39
FARMERS' BULLETIN No. 278.—LEGUMINOUS CROPS FOR GREEN MANURING:	
Green manuring	5
The use of green manures	6
The principal leguminous crops	7
How legumes get nitrogen from the air	8
Inoculation	9
Sources of soil nitrogen	10
Loss of soil nitrogen	11
Composition of green manure crops	11
Green manuring compared with feeding	12
Orchard cover crops	13
Crops to follow green manures	14
The choice of a green manure crop	14
The principal green manure crops	15

Page.

FARMERS' BULLETIN NO. 279.—A METHOD OF ERADICATING JOHNSON GRASS:
Introduction 5
Rootstock habits of Johnson grass 6
Types of rootstock development 7
Method of eradication based on rootstock habits 10
Experimental results 12
Necessity of careful tillage 13
Chemical methods of destruction not practical 14
Rotation with winter grain 14
Rotation with cultivated crops 15
Cutting back sometimes necessary for eradication 16
Summary and conclusions 16
FARMERS' BULLETIN NO. 280.—A PROFITABLE TENANT DAIRY FARM:
Introduction 7
Contract for the operation of this farm 7
Farm animals 8
Cropping system 9
Buildings 11
Hired help 14
Handling manure 14
Equipment 15
Disposal of product 15
Financial statement for 1905 16
FARMERS' BULLETIN NO. 281.—EXPERIMENT STATION WORK, XL:
Insoluble phosphates 5
Forms and methods of applying lime 7
Fertilizing value of the sediment in irrigation water 8
Hardy Bermuda grass 10
The Williamson method of corn culture 13
Carbon bisulphid for killing sassafras sprouts 16
Soluble oils for the control of San Jose scale 17
Indian corn as a food for man 18
Storing preserves, canned fruits, and canned vegetables 22
Natural and artificial incubation of chickens 24
Bare-lot method of raising lambs to avoid nodule disease 28
Some milk terms 29
FARMERS' BULLETIN NO. 282.—CELERY:
Introduction 7
Climatic and soil requirements of celery 9
Fertilizers 10
Preparation of the soil 11
Seed sowing and plant production 12
Transplanting 14
Watering 14
Planting in the open ground 17
Mulching 18
Cultivation 19
Diseases 21
Insect enemies and their control 22
Methods of blanching 23
Storing 28
Marketing 32
Profits to be derived from celery culture 34
Varieties of celery 36

Page.

FARMERS' BULLETIN NO. 283.—SPRAYING FOR APPLE DISEASES AND THE CODLING MOTH IN THE OZARKS:
Introduction 5
Scope of the work 6
Orchard conditions in the Ozarks 6
Plan of work 7
Bitter-rot 7
Apple blotch 14
Leaf-spot diseases 18
Apple scab 20
The codling moth 23
Commercial results 32
Materials for spraying 34
Equipment for spraying 38
Applying the spray 40

FARMERS' BULLETIN NO. 284.—INSECT AND FUNGOUS ENEMIES OF THE GRAPE EAST OF THE ROCKY MOUNTAINS:
Insect enemies 5
Insecticides 26
Fungous diseases 28
Fungicides 38
Spraying 41

FARMERS' BULLETIN NO. 285.—THE ADVANTAGE OF PLANTING HEAVY COTTON SEED:
Heavy versus light seed 5
Preparation of seed for separation 6
Method of separating seed 9
Tests of separated seed 11
Separation of Sea Island cotton seed 14
How to obtain the necessary apparatus for cotton seed separation 16

FARMERS' BULLETIN NO. 286.—COMPARATIVE VALUE OF WHOLE COTTON SEED AND COTTON-SEED MEAL IN FERTILIZING COTTON:
Introduction 5
Seed used for fertilizer 5
Attitude of the oil mills with reference to crushing the seed 6
Position of growers as to disposal of seed 6
Points considered in testing seed in comparison with meal 7
Character of land used for tests 7
Relative quantities of seed and meal tested 7
Lasting effect of seed 7
Relative availability of plant food in seed and meal 8
Conclusions drawn from results of experiments 12
Profit to growers by disposing of seed 12
Preservation of seed 13

FARMERS' BULLETIN NO. 287.—POULTRY MANAGEMENT:
Making a start with poultry 5
Classification 5
Houses and inclosures 6
Management of hens for egg production 19
Raising chickens 27
Broilers, roasters, and capons 34
Fattening poultry 36
Marketing poultry and poultry products 38
Preserving eggs 41
Diseases, bad habits, and insect pests 42

FARMERS' BULLETIN NO. 288.—THE NONSACCHARINE SORGHUMS: Page.

Classification of sorghums 7
Introduction into the United States 7
Groups of nonsaccharine sorghums 8
Characteristics of the different varieties 9
Importance of the crop 11
Soils adapted to the crop 12
Drought resistance 12
Alkali resistance 13
Effect of sorghums on the land 13
Preparation of the soil 14
Planting 15
Cultivation 16
Harvesting 17
Thrashing 19
Yields 20
Utilization of the crop 21
Feeding value and chemical analyses 25
Market for the seed 26
Diseases and injurious insects 26
Improvement of the crop 27
Summary 28

FARMERS' BULLETIN NO. 289.—BEANS:

Introduction 5
Types of beans 6
Field and garden groups 7
Acreage grown 8
Field beans 10
Garden beans 18
Diseases and enemies 28

FARMERS' BULLETIN NO. 290.—THE COTTON BOLLWORM:

Introduction 7
Life cycle 8
Food plants 10
Seasonal history 11
Extent of injury 12
Means of control 14
Field work, 1905–1906 20
The more important natural factors in bollworm control 29
Recommendations 31

FARMERS' BULLETIN NO. 291.—EVAPORATION OF APPLES:

Introduction 5
Types of evaporators 6
Evaporator appliances, etc 18
Apples suitable for evaporation 26
Preparing the fruit for drying 27
Drying the fruit 29
Handling the waste 32
Weight of evaporated apples 33
Laws relating to evaporated fruits 33
Handling evaporated apples 34
Range of prices 34
Grading 35

FARMERS' BULLETIN NO. 291.—EVAPORATION OF APPLES—Continued. Page.
Kinds of packages used 35
Packing 36
Storing the fruit 38
FARMERS' BULLETIN NO. 292.—COST OF FILLING SILOS:
Introduction 5
Methods employed 5
Arrangement of labor 9
Size of loads 10
Crops used 11
Condition of the crops when cut 11
Equipment 12
Partnership arrangement among farmers 15
FARMERS' BULLETIN NO. 293.—USE OF FRUIT AS FOOD:
Introduction 7
Wild and cultivated fruits 7
Market conditions and fruit supply 9
Color and flavor of fruits 10
Composition of fruits 11
Ripening and its effect on composition 20
Ways of serving fruit 21
Place of fruit in the diet 22
Digestibility of fruit 25
Relative economy of fruits and other foods 26
Cooking and its effects on fruit; jelly making 28
Overripe, decayed, and unripe fruit 30
Handling and marketing fruit 32
Storing fruit 34
The hygiene of fruit 35
Extent of the fruit industry in the United States 36
Conclusions 38
FARMERS' BULLETIN NO. 294.—FARM PRACTICE IN THE COLUMBIA BASIN UPLANDS:
Introduction 7
Description of the region 7
Soils 11
Agricultural history 11
Cropping systems 13
Soil tillage 13
Varieties of wheat grown 22
The permanency of the single-crop system of farming 27
Conclusions 29
FARMERS' BULLETIN NO. 295.—POTATOES AND OTHER ROOT CROPS AS FOOD:
Introduction 5
Potatoes 7
Cetewayo, or Zulu, potatoes 23
Sweet potatoes 23
The Jerusalem artichoke 28
Stachys 29
Tropical starch-bearing roots 29
Succulent roots, tubers, and bulbs 32
Roots used as condiments 41
Summary 42

	Page.
FARMERS' BULLETIN NO. 296.—EXPERIMENT STATION WORK, XLI:	
Wells and a pure water supply	5
Availability of phosphates in relation to soil acidity	6
Pure seed versus poor seed	7
Selection for disease-resistant clover	9
Eradication of wild mustard	10
Sterilization of soils for the prevention of diseases of plants	11
Production of seedless tomatoes	13
Pickling olives and mock olives for home use	14
The hay box or fireless cooker	16
Combating insect enemies of shade trees	19
Feeding whole grain	21
The improvement of cattle	23
Ventilation of stables	25
Hog cots	27
Preserving eggs in water glass	29
American camembert cheese	31
FARMERS' BULLETIN NO. 297.—METHODS OF DESTROYING RATS:	
Introduction	3
Methods of destroying rats	4
Rat-proof construction	7
Natural enemies of rats	8
Conclusions	8
FARMERS' BULLETIN NO. 298.—FOOD VALUE OF CORN AND CORN PRODUCTS:	
Introduction	5
Food value of corn	8
Milling	11
Cooking	15
Hulled corn	21
Corn breakfast foods	21
Pop corn and parched corn	22
Digestibility of foods made from corn	23
Wholesomeness of corn	26
Raw corn as an article of diet	28
Place of corn in the diet	29
Pecuniary economy of corn	32
Green corn	34
Summary	37
FARMERS' BULLETIN NO. 299.—DIVERSIFIED FARMING UNDER THE PLANTATION SYSTEM:	
Introduction	7
An experiment in diversified farming	9
Conclusion	14
FARMERS' BULLETIN NO. 300.—SOME IMPORTANT GRASSES AND FORAGE PLANTS FOR THE GULF COAST REGION:	
Mexican clover	5
Beggarweed	7
Velvet beans	9
Guinea grass	11
Para grass	13
